10 Day Notice: North Point Outfall Rehabilitation Project

What: The project will remove sediment buildup inside and outside the North Point Outfall structure, and reline/install corrosion protection systems on pipes and structural supports. These facilities are a critical part of wastewater operations and due to aging and the harsh marine environment are in need of repair.

Who: The Dutra Group is the contractor working for the SFPUC.

When: Project timeline is May 2017 to February 2018. Anticipated start date for construction is May 9th 2017 with completion scheduled for October 2017.

Where: Pier 33, Pier 35, Bay Street and Kearny Street, and portions of parking lanes along The Embarcadero.

What to expect during construction:

- The project team will work to minimize disruption to normal neighborhood activity; however there will be occasional inconveniences due to heavy equipment movement and other construction activities.
- Businesses and residents in the work zone will maintain access to their garages and entrances, although there may be temporary delays. Advance notice will be given.
- Sidewalks will remain accessible to pedestrians. For safety, portions of the sidewalk may be sectioned off, covered by a ramp or re-routed.
- Parking will be restricted in the work zone. At different phases of the project, some street parking/traffic along Bay and Kearny Streets and the Embarcadero in front of Pier 33 and 35 will be impacted. Please see posted signs for exact details.
- While the contractor is required to abide by the City’s noise and vibration ordinances, neighbors should expect some noise and limited dust during this work.
- No interruption in water service or quality is expected during construction. Advance notice will be given.
- In the event of weekend work advance notice will be given.

The Sewer System Improvement Program (SSIP) is a 20-year, multi-billion dollar citywide investment required to upgrade our aging sewer infrastructure to ensure a reliable and seismically safe sewer system now and for generations to come. For more information visit sfwater.org/SSIP.

Clean, efficient, reliable...

Every day, we deliver high-quality, efficient water, power and sewer services to serve the needs of the San Francisco Bay Area.

**Water** – Delivering high-quality water every day
We deliver drinking water by gravity to 2.6 million people and businesses in San Francisco, Alameda, Santa Clara, and San Mateo counties.

**Power** – Generating clean energy for vital City services
We generate clean, reliable energy to power vital City services, such as MUNI, streetlights, schools and public buildings.

**Sewer** – Protecting public health and the environment
Through our treatment system and innovative programs, we manage sewage and stormwater, and prevent pollution of the bay and ocean.

Please help conserve water.
