Alameda Creek Watershed Center in Sunol

The San Francisco Public Utilities Commission (SFPUC) is developing plans to construct the Alameda Creek Watershed Center in Sunol as part of its effort to improve existing SFPUC facilities in the Sunol Yard.

The Center would be intended to provide a place for people to:

- Gather:
  - Inside – A meeting room for public use
  - Outside – Attractive grounds and native landscaping
- Learn about and appreciate the Alameda Creek Watershed, its natural resources and its role as part of the SFPUC water supply system. Educational programs for school children would also be supported at the Center.
- Connect with the history of the Sunol Valley
- Participate in activities associated with the Sunol Ag Park and volunteer opportunities in the watershed and at the Center.

The SFPUC proposes to build the Alameda Creek Watershed Center in Sunol near the historic Sunol Water Temple. It would include multiple buildings clustered around an open courtyard designed to complement the existing natural and built environment. As proposed, the Center will include the following facilities:

1. Exhibit Hall (approx 2,000 square feet)
2. Learning Laboratory, Offices and Storage (approximately 1200 square feet)
3. Community Conference Center (approximately 1200 square feet)
4. Courtyard
5. Outdoor Classroom
6. Landscaping and other visit amenities:
   New picnic areas and places for people to relax and spend some time may also be included.
7. Public Restrooms
