Calaveras Dam Replacement Project
Air Monitoring Station A3B
Total Asbestos

Legend

- A3B Target Level
- A3B Cumulative Average
- Result

Target Level
Target Risk Level Concentration
Cumulative Average
Station Average to Date Over Project Duration
Result
24-hr Average Asbestos Concentration
Concentration (s/cc)
Asbestos Structures per Cubic Centimeter of Air

Note:
Trigger levels (TLs) at site perimeter stations and Target Monitoring Levels (TMLs) at offsite ambient stations are periodically re-calculated by incorporating new data that reflect a change in actual site conditions. These revisions are necessary to continue to meet the same level of public health protectiveness.

On October 1, 2016 we revised both the perimeter station TLs and TMLs at ambient stations. Therefore, all graphs posted prior to this date show the previous TLs and TMLs, while the new graphs posted after this date reflect the current target level.
